

ENVIRONMENTAL PRODUCT DECLARATION

ISO 14025 ISO 21930 EN 15804

Owner of the declaration	H-vinduet Magnor AS
Program holder	The Norwegian EPD Foundation
Publisher	The Norwegian EPD Foundation
Declaration number	00233E
Issue date	20.12.2013
Valid to	20.12.2018

H-window 1,23 x 1,48, type AT200E

Product

H-vinduet Magnor AS
Manufacturer**MagnorVinduet**
Bedre får du ikke

General information

H-window 1,23 x 1,48, type AT200E

Product

Program holder:

The Norwegian EPD Foundation
Post Box 5250 Majorstuen, 0303 Oslo
Phone: +4723088000
e-mail: post@epd-norge.no

Declaration number:

00233E

This declaration is based on Product Category Rules:

CEN Standard EN 15804 serve as core PCR
Windows and Doors, NPCR 014 rev1 (2013-2018)

Declared unit:

H-window, 1,23 m x 1,48 m, type AT200E, with U-value
1.2 W/m²K

Declared unit with option:

Functional unit:

H-window, 1,23 m x 1,48 m, type AT200E, with U-value
1.2 W/m²K and an expected service life time of 60 years.

The environmental product declaration has been

worked out by:

Kari Sørnes,
SINTEF Byggforsk

Verification:

Independent verification of data and other environmental
information has been carried out in accordance with
ISO14025, 8.1.3.

Product

Product description:

H-window, type AT200, is a sliding hinged window for installation in exterior walls. The window can be supplied in various widths and heights. Approx. 70% of the window opening is glass. The window frame consists of an outside layer of aluminum, multi-isolator composite material and a layer of wood on the side facing inside.

Different types of glass and dimensions of the interior wood can be used, so that one can get an overall U-value for the whole window of 0,77 W/m²K and up. Dimensions presented by the functional unit are put out by PCR and is not the real dimensions that H-vinduet Magnor AS supplies.

Market:

Norway and parts of Europe

Reference service life:

60 years

Technical data:

Weight: 54.9 kg/FU

Product specification:

Amounts based on allocation rules are given in the table below.

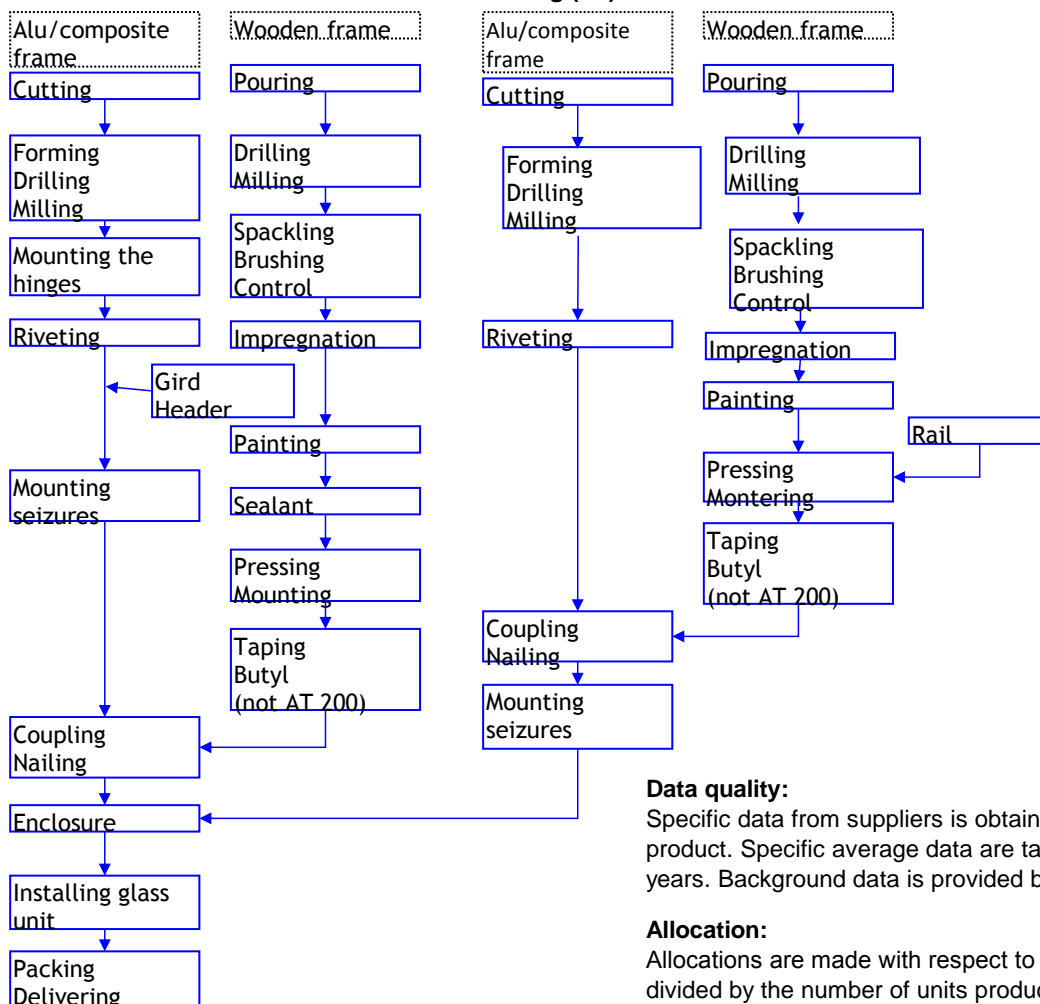

Materials	kg	%
Isolated Glass Unit (IGU)	27,3	49,7
Steel	2,8	5,2
Aluminium profiles (85% rec.)	4,1	7,5
Plastic (PP)	0,4	0,8
EPDM-rubber	0,3	0,5
Impregnant	0,4	0,7
Composite ABS/PVC	8,0	14,6
Pine	11,5	20,9
Paint	0,02	0,0
Glue	0,001	0,0
Total	54,9	100,0

LCA: Calculation rules

Functional unit:

H-window, 1,23 m x 1,48 m, type AT200E, with U-value 1.2 W/m²K and an expected service life time of 60 years.

Technical flowsheet related to the manufacturing (A3):

Data quality:

Specific data from suppliers is obtained for about 70% of the product. Specific average data are taken from the last 1-3 years. Background data is provided by Ecoinvent v2.2.

Allocation:

Allocations are made with respect to mass: Total consumption divided by the number of units produced (according to PCR)

Cut-off criteria:

According to PCR

LCA: Scenarios and additional technical information

The manufacture is located at Magnor, a village in the municipality of Eidskog in Hedmark, Norway. The insulated glass units of Press Glass AS, steel from Stilka Industri AS, aluminum profiles from SAPA Magnor AS and composite from Primo AS, all of which have provided specific data on their production. In addition, pine, painting, impregnating, plastics and adhesives are included in the analysis. Scenarios for A4 to C4 are described below.

Transport from production site to building site (A4)

Type	Capacity utilisation (incl. return) %	Type of vehicle	Distance km	Fuel/Energy consumption	Value (l/t)
Lorry		Diesel, 16-32t, EUR 4	400	3,64 kg/tkm	

Additional information:

Transport from the production site to the sentral warehouse is 50 km (according to the rules drawn by EPD-Norway).

End of life (C4)

	Unit	Value
Hazardous waste disposed	kg	
Collected as mixed construction waste	kg	
Reuse	kg	
Recycling	kg	
Energy recovery	kg	
To landfill	kg	54,9

Maintenance (B2)

	Unit	Value
Detergent pr year (0,5dl each time)	dl	1,5
Water pr year (1 l each time)	l	3

Transport to waste processing (C2)

Type	Capacity utilisation (incl. return) %	Type of vehicle	Distance km	Fuel/Energy consumption	Value (l/t)
Lorry		Diesel, 16-32t, EUR 4	50	3,64 kg/tkm	

Installation (A5) and De-construction demolition (C1)

Energy use in the installation (A5) and disassembly (C1) is considered to be small enough to be neglected (using 1% cut-off rule based on PCR). Reason: A typical mounting of a reference window is done manually by lifting the window into the opening. Then it must be adjusted properly in place and screwed with a cordless screwdriver and 4 screws to the wall. When removing it, the same is done just the opposite way, screws are removed or cut across, and the window is lifted out.

LCA: Results

Under are the system boundaries presented. The life cycle stages which are considered relevant are A1-A4, B2, C2 and C4.

System boudaries (X=included, MND=modul not declared, MNR=modul not relevant)

Reading example: 9,0 E-03 = 9,0*10⁻³ = 0,009

Figure: Distribution of carbon emissions on the different life cycle stages

It is A1 which contribute the most to emissions and energy use. The major emission contributions to A1 are coming from the glass panes (Isolated Glass Units) and the composite material in the frame (mixture of PVC and ABS).

Specific Norwegian requirements

Electricity

For the manufacture phase (A3), the Norwegian mean supply electricity mix from 2007-2011 (import included) is used.

GHG emissions: 0,013 kg CO₂ eqv/MJ

Dangerous substances

None of the following substances have been added to the product: Substances on the REACH Candidate list of substances of very high concern (of 20.12.2013) substances on the Norwegian Priority list (of.20.12.2013) and substances that lead to the product being classified as hazardous waste. The chemical content of the product complies with regulatory levels as given in the Norwegian Product Regulations.

Transport fra produksjonssted til sentrallager

Transport from the production site to the sentral warehouse is 50 km (according to the rules drawn by EPD-Norway).

Indoor environment

No tests has been performed related to indoor environment.
